DEPI AI Marketing Automation Consultancy Case

Silver - Saudi Arabian Market

Project Name	DEPI AI Marketing Automation Consultancy Case - Silver
Instructor	Dr. Asmaa Abdel Mageed

Project Overview

This project focuses on developing an AI-powered Marketing Automation Consultancy Case for Silver, an elegant sanitary ware brand operating in the Saudi Arabian market.

Silver was launched in June 2026 and aims to establish itself as a recognized and trusted brand in the elegant sanitary ware segment. Despite the quality and design of its products, the brand currently faces a key challenge: limited brand awareness among Saudi consumers.

The project team will act as an AI Marketing Consultancy, combining digital marketing expertise, consumer insights, AI tools, and marketing automation to develop a practical and scalable growth strategy for Silver.

Team Members

No.	Name	Role
1.	Dina Adel Abdullatif	Team Leader
2.	Mustafa Nabil Hamdy	-
3.	Aliaa Abdulkhaleq Abdulwahab	-
4.	Abdulrahman Majdi Abdulaziz	-
5.	Rahma Alaa Mohammed	-
6.	Youssef Nasser Al-Sayed Ghaith	

Project Objectives

The primary objective of this project is to design, implement, and test a fully integrated, AI-powered marketing automation and lead generation system for Silver. Specific objectives include:

- *Streamline Lead Acquisition & Qualification:* Establish a high-converting digital funnel (utilizing landing pages, targeted Meta/Google traffic, and structured UTM parameters) to capture and qualify potential B2B and B2C clients (such as interior designers, contractors, and homeowners).
- *Deploy AI-Driven Automation Workflows:* Build robust automation sequences using Make.com or n8n that instantly process incoming inquiries, update CRM lifecycle stages, and trigger personalized AI responses via WhatsApp or Messenger.
- *Enhance Content & Creative Scalability:* Implement an AI-assisted content system comprising targeted content pillars, a 30-day content calendar, and high-converting copywriting frameworks (hooks, ad variations, and video scripts) tailored to Silver's brand voice.
- *Establish Transparent Performance Tracking:* Implement end-to-end event tracking and attribution models (via Google Tag Manager and Meta Pixel) to monitor campaign performance, traffic sources, and conversion funnels accurately.
- Increase Silver's brand awareness among the Saudi target audience.
- Establis Silver's positioning as an elegant and premium sanitary ware brand.
- Identify and understand the needs, interests, and behaviors of potential Saud customers.
- Develop an effective digital marketing and content strategy.
- Use AI and marketing automation to improve customer acquisition, engagement, and conversion.
- Build a scalable marketing consultancy framework that supports Silver's long-term digital growth.

Project Scope

- Market & Audience Analysis: Understand the Saudi sanitary ware market, target customers, needs, interests, and digital behavior.
- Brand Positioning: Develop a clear positioning strategy for Silver as an elegant and premium sanitary ware brand.
- Digital Marketing Strategy: Identify suitable digital channels, campaigns, and customer acquisition opportunities.
- Content Strategy: Develop content pillars and approaches aligned with the Saudi target audience.
- AI Integration: Use AI tools to support market research, content creation, customer segmentation, and campaign optimization.
- Marketing Automation: Design automated customer journeys for lead nurturing, engagement, and conversion.
- Performance Measurement: Define relevant KPIs to measure awareness, engagement, leads, and conversions.
- Growth Framework: Provide recommendations and a scalable framework for Silver's future digital growth.

Project Plan

Phase 1 - Discovery & Research

Understand Silver's business, products, competitors, market environment, and current digital presence.

Phase 2 - Target Audience Analysis

Develop customer segments/personas and identify their needs, behaviors, pain points, and purchasing motivations.

Phase 3 - Marketing Strategy

Define brand positioning, marketing channels, content pillars, campaign concepts, and customer acquisition strategy.

Phase 4 - AI & Automation Design

Select suitable AI and automation tools and design automated marketing workflows and customer journeys.

Phase 5 - Implementation Prototype

Create sample content, campaigns, automation workflows, and practical use cases demonstrating the proposed solution.

Phase 6 - Measurement & Optimization

Define KPIs and measurement methods for awareness, engagement, lead generation, conversion, and marketing efficiency.

Phase 7 - Final Consultancy Case

Consolidate the research, strategy, AI applications, automation workflows, KPIs, and recommendations into the final consultancy case and presentation.

Week Project Timeline & Milestone Breakdown

Week / Phase	*Core Activities & Deliverables*	*Focus Areas & Execution*
Week 1: Strategy, Research & Brand Assets	• Define business model, target audience personas, and competitor landscape for Silver. • Establish brand voice guide, compact visual brand kit, and initial prompt library. • Set up core data structures, CRM logic, and tracking frameworks.	• Brand positioning & messaging • Asset generation & visual styling • Initial tracking & data mapping
Week 2: Landing Pages, Funnels & Content Factory	• Build and polish landing pages (applying the 7-section skeleton, speed optimization, and mobile optimization). • Create multi-source media plans and retargeting tiers. • Generate automated content batching systems and copywriting variants.	• LP creation & UX auditing • Meta/Google tracking setup (GTM & Events Manager) • Automated content workflow
Week 3: Automation Workflows, Testing & Final Defense	• Build and test automated workflows using Make.com/n8n (integrating CRM logic and WhatsApp/Messenger simulation). • Run end-to-end testing	• Automation & AI orchestration • End-to-end debugging & testing

Week / Phase	***Core Activities & Deliverables***	***Focus Areas & Execution***
	scenarios, fix errors, and compile the testing report. • Finalize the Looker Studio dashboard, weekly report PDF, and presentation deck.	• Final reporting & case study defense
